

KaVo INTRA LUX Motor K 200

Top performance.

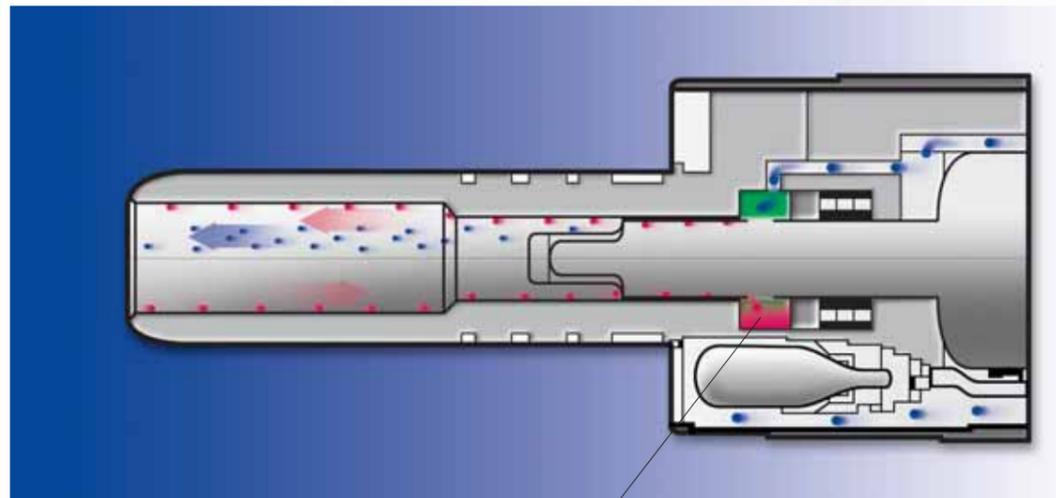

KaVo. Dental Excellence.

The compact power that keeps running.

The latest achievement from KaVo development: INTRAmatic K-LUX 200 motor. Its particular strengths are high continuous performance and power. Whether 1,000 or 40,000 revolutions per minute, this motor ensures stable speed even when under load.

High power demands a large motor? Not with KaVo. The new INTRAmatic K-LUX 200 is one of the smallest and most reliable motors on the dental market. And a special protective barrier against internal contamination is a KaVo innovation, which ensures that the motor has

an extremely long life. The new KaVo INTRAmatic K-LUX 200 motor. Small on the outside, great inside and with a 24 month warranty.

The KaVo Care-Ring protective barrier guards against contamination. All cleaning and care agents are trapped so that they do not reach the inside of the motor. And because the motor is not contaminated, its life is increased.

A practical solution. The removable motor sleeve is sterilizable at 135 degrees.

Integrated non-return valve. Prevents recontamination of the spray water system with micro-organisms.

Elastic and easily rotatable. The newly developed tubing maximizes the handling and facilitates your work.
