- Broad activity spectrum in short contact time
- Does not leave any trace when drying
- Pleasantly fragranced
- Without dye

DENTASEPT® SPRAY 60 PRO

Disinfectant solution

PRODUCT CHARACTERISTICS

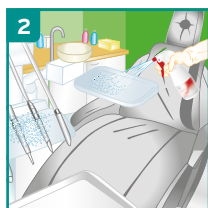

- Ready to use product
- Clear colourless solution
- Density: approx 0.9
- pH at +20°C: approx 5.5

INSTRUCTIONS FOR USE

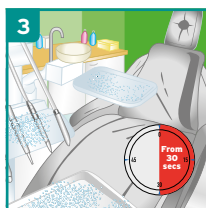

Ready-to-use.

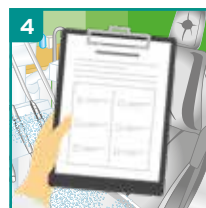

Use on previously cleaned medical devices. Before application, check the compatibility of the areas to be treated with alcohol. Electrical devices being disinfected must be switched off.

Spray on the areas to be treated until they are totally moistened. Apply in sufficient quantity (+/- 40 ml/m²). Complete wetting of all devices to be disinfected is important.

Respect the indicated contact time for the required antimicrobial activity. Rinsing is unnecessary except for areas intended to come into contact with skin or mucosa.

For the frequency of use, refer to the hygiene plan in place. Please refer to the manufacturer's instructions for use for disinfecting medical devices.
